

DORO

LIGHTING SOLUTIONS

OUTDOOR

CATALOG 2026

At DORO Lighting Solutions, we are more than just a lighting brand — we are a reflection of passion, creativity, and intention. We believe in the transformative power of light and its ability to uplift spaces and spirits. With curiosity as our compass and innovation as our guide, we embrace each challenge as an opportunity to evolve, glow brighter, and spread that brilliance to the world around us.

We proudly celebrate our journey in lighting—rooted in purpose, shaped by experience, and inspired by the future.

**CRAFTED BY PASSION,
GLOWING WITH MEANING.**

The History of Lights

1802

Humphry Davy

Invented the Electrical ARC lamp.

1840

Warren de la Rue

Built a light bulb using a platinum filament that was coiled inside a vacuum tube.

1874

Henry Woodward & Mathew Evans

Built a light bulb using a platinum filament that was coiled inside a vacuum tube.

1878

Thomas Edison

Filed a patent under the label "improvement in Electric Lights."

1879

Edison

Submitted another patent.

1880

Edison

Began marketing and manufacturing the latest version of his bulb to commercial clients & built the first central power plant in the U.S

1893

General Electric

Produced the first enclosed carbon arc lamp for commercial clients.

1893

Nikla Tesla

Demonstrated the possibility of wireless electricity, which he used to light a geissler tube.

1901

Peter Cooper Hewitt

Introduced the Mercury-Vapor Lamp (gas discharge lamp).

1910

Georges Claude
Demonstrated Neon Lighting.

1926

Edmund Germer
Submitted his patent for the first fluorescent lamp.

1938

Fluorescent lighting
technology was commercialize

1961

James Beard & Gary Pittman
Invented LEDs

1962

Nick Holonyak Jr.
produced the first LED that emitted light in a visible brand

1872

M. George Craford
Produced a yellow LED.

1979

Shuji Nakamura
Developed a blue LED.

1980

Philips
released its SL model of the compact fluorescent lamp (CFL).

2006

LEDs
were finally a competitive lighting option

2011

Philips
released its SL model of the compact fluorescent lamp (CFL).

Knowledge of Lights

Lumen (Unit: lm)

Lumen is the standard unit for measuring luminous flux, indicating the total quantity of visible light emitted by a source. It reflects the overall brightness of the luminaire.

Beam Angle (Unit: degrees)

Beam angle defines the spread of light emitted from a source. It's the angle where luminous intensity drops to 50% of its peak, determining how narrow or wide the light beam will appear.

Colour Temperature (Unit: Kelvin)

Measured in Kelvin (K), color temperature defines the appearance of the light emitted—ranging from warm (yellowish) to cool (bluish) tones. It's based on the temperature of a black-body radiator that emits light of a similar color.

Lux (Unit: lx)

Lux quantifies the amount of light hitting a surface. One lux equals one lumen per square meter, providing a direct measure of illumination intensity in a space.

Driver

A driver is the essential electronic component that regulates and supplies the correct power to LED light sources, ensuring consistent performance and safety.

Light Emitting Diode (LED)

An LED is a semiconductor device that transforms electrical energy into visible light, offering energy efficiency, longevity, and superior performance.

Colour Rendering Index (CRI)

CRI measures a light source's ability to reveal the true colors of objects in comparison to natural light. Rated on a scale of 0 to 100, higher CRI ensures more accurate color representation.

Kelvin

Kelvin is the unit used to describe color temperature, helping to distinguish between warm, neutral, and cool tones in lighting environments.

Tunable & Dimmable LED

LEDs from DORO are fully dimmable and tunable, enhancing ambiance while improving energy efficiency. Dimming methods include

- A. Triac/Phase Cut (Leading or Trailing Edge)
- B. 1-10V DC Analog Dimming
- C. DSI (Digital Signal Interface)
- D. DALI (Digital Addressable Lighting Interface)

IES Files

IES files, developed by the Illuminating Engineering Society (IESNA), provide standardized photometric data. Lighting designers use these files to simulate real-world lighting performance in professional design software.

LED Driver

DORO Lights incorporates top-tier drivers from Fulham/Eaglerise/Osram/Philips – renowned global manufacturers. These constant-current drivers ensure optimal power delivery and come with a 2-year warranty.

COB (Chip-On-Board) LED

COB technology mounts multiple LED chips directly onto a substrate to form a single module. This design reduces thermal resistance and improves light output and heat management.

Design Adaptability

DORO embraces modular design to stay ahead in a fast-evolving LED industry. Future-proofing ensures seamless upgrades to next-generation modules without overhauling fixture designs.

Colour Consistency in LEDs

DORO ensures consistent light quality through LED binning and MacAdam step classification. Each LED is categorized based on color, brightness, and voltage, maintaining uniform appearance across installations.

Heat Management

Proper thermal design is critical to LED performance. DORO fixtures incorporate high-grade heat sinks that dissipate heat efficiently, extending the life and reliability of the LEDs.

Dimming Control Protocols

Flickering often arises from mismatched drivers and control systems. At DORO, we ensure compatibility between our LEDs and drivers to deliver stable, flicker-free lighting performance.

Why Lumens Matter More Than Watts

In LED technology, lumen output is the true measure of performance – not wattage. As efficiency improves, newer LEDs produce significantly more lumens per watt, making wattage a less relevant metric.

Suggestive Lux Level

Area	Lux
Offices - conference rooms	750
Shops

IP Protection Codes

The IP prefix followed by two significant digits indicates the fixture's resistance to the penetration of solids and liquids safety rating (IEC 259 issue) 1st digit: against the penetration of solid body and contact with live components. 2nd digit against penetration by liquids.

IP20	Protection against ingress of solids objects of $\varnothing \geq 12\text{mm}$. No protection against water.
IP40	Protection against ingress of solids objects of $\varnothing \geq 1\text{mm}$. No protection against water.
IP43 	Protection against ingress of solids objects of $\varnothing \geq 1\text{mm}$ and against falling rain.
IP44 	Protection against ingress of solids objects of $\varnothing \geq 1\text{mm}$ and against water splashes from all sides.
IP54  	Protection against ingress of dust and water splashes from all sides.
IP55  	Protection against ingress of dust and jets of water from all directions.
IP64  	Protection against ingress of dust and water splashes from all directions.
IP65   	Protection against ingress of dust and jets of water from all directions.
IP67  	Dust-tight and protected against the effects of temporary immersion.
IP68  	Water splashed against the enclosure from any direction shall have no harmful effect.
